FRONTEND DEVELOPER

PERSONAL INFO

I am a Frontend Developer with React, passionate about the technology, innovation and the future. I am a very self-taught person and in the last year I have been learning a lot about techs of the Front like React and JavaScript. I am looking for amazing companies to share my knowledge and grow my skills.

WORK EXPERIENCE

SELECTA

Tech Stack: Python, Selenium, JavaScript, Node.

I was in charge of the tech area of the company.

- I participated in the team to create the web

- I improved the database of vacancies of the company with a script made in Javascript and Python, going from 80 to more than 4000 vacancies per month.

- I made a script to create a tech talent database in LATAM for improve the credibility of the company.
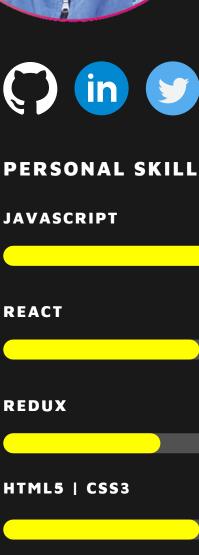

ROPA SHOP | ECOMMERCE

Tech Stack: JavaScript, React, Redux, React Router Dom, Sass, GitHub, Git, Vercel.

In this project, I was charge of the main site for selling in Ropa Shop, an entrepreneurship based in Ambato, Ecuador. With this site, Ropa Shop will be able to increase its sales and its reach.
